

PROJECT MANAGEMENT

Ensure your project flows smoothly with the help of our experienced project team.

Mainstream Engineering (MEL) is a multidiscipline engineering design and project management consultancy. We pride ourselves on delivering effective, safe, value adding solutions that are backed up by our prompt service.

From concept to completion, we plan and manage projects of all different sizes and complexity. Using industry standard tools, we ensure projects are optimally planned and delivered on time and within budget.

MEL's skilled project management team clearly defines a project from the outset, achieving the balance between available time, money, and resources.

As experienced engineers we can mitigate common issues and hazards, ensuring the safe and smooth implementation of your project.

Applying the practical knowledge we have gained over many years, MEL will work collaboratively with you to determine the best way to integrate new equipment, improve an existing system or optimise a green field installation.
